

Overview

Environmental law is among the most challenging legal areas for Dutch businesses. The dynamic legislative process and the continuous development of jurisprudence are leading to additions and amendments on an almost daily basis. At the same time, institutes in the Netherlands and Europe are tightening the regulations and supervision procedures.

Dentons Boekel monitors these processes closely. We apply our detailed knowledge and expertise to advise you on the practical implications of the latest developments in environmental legislation and jurisprudence. With a keen understanding of all aspects of environmental law, our legal team provides a comprehensive and integrated approach across the entire spectrum.

We are ready to assist you with:

- Environmental permits
- Emissions
- Spatial planning
- Surface water pollution
- Soil pollution
- Hazardous waste and substances
- Noise pollution
- Mining and extraction enterprises
- Flora, fauna and eco-protection
- Real estate development
- Civil law procedures prior to and after licensing
- Supervision and enforcement of licence conditions
- Legal liability

Our Environmental Law practice has wide-ranging experience in strategic decision making in technology-related enterprises. We help make the legal context as transparent as the business process by clearly identifying risks and addressing your needs.

Our team counsels private- and public-sector organizations. We act as advisors and, if necessary, will instigate lawsuits in national and European courts. We also assist in politically-sensitive and potentially controversial cases by formulating discreet and appropriate solutions without compromising the delicate nature of the situation.
