

## Overview

Our Real Estate team guides Dutch and foreign investors, pension funds and private investors through the entire legal process in real estate transactions. In addition to the sale of office, retail and residential accommodation, the team has a wealth of experience in the purchase and sale of special types of real estate, such as portfolio purchases, hotels, logistics, parking and healthcare real estate.

Bolstered by the strong support of the full-service Real Estate group, the transaction team can advise on any aspect of real estate deals. Whether your needs involve finance, civil-law notary work, private equity or the establishment of joint ventures, funds and public/private partnerships, we are here to help.

Our transaction team operates in exactly the way you would expect: short lines of communication, genuine support and assistance throughout the process, and legal advice that benefits your bottom line. We understand better than anyone that a real estate transaction is a commercial process. While close legal supervision is essential, it should never be allowed to gain the upper hand.
